

DECENTRAPAD

LITEPAPER

UPDATED 04/04/2022

INTRODUCTION TO DECENTRAPAD

What is a Launchpad?

Launchpads are the back-bones of new cryptocurrency projects and coins.

They serve as the link between the project and the community which funds them.

In exchange for being part of the launchpad and for funding the project in its early stages, the community has the opportunity to get into the project at what is typically a very low price.

Launchpads importantly raise funds from their communities, and in exchange take a percentage fee of the funds raised, growing the launchpad and making its token stronger.

Initial DEX offerings (IDOs)

In order for a new crypto project to be tradable on the open market, there must be liquidity provided on a decentralised exchange (DEX) or on a centralised exchange (CEX). If this liquidity is not provided, then the coin will likely not be tradable, causing the price to be unstable and in the worst cases can cause the value to drop heavily.

In order to gather this liquidity to facilitate trading, new tokens are offered up at a pre-determined or "IDO price", where the buyer can lock funds up in exchange for new tokens during the **Token Generation Event (TGE)**. These funds not only allow the project to grow, but they provide funding for liquidity pools, allowing DEX trading.

Community members and supporters of the project are often very keen to invest at the IDO stage because they can purchase at a **guaranteed, low price**.

IDOs have taken the crypto world by storm as the most efficient way to source crowd-funding for new crypto projects.

Billions of dollars have been raised in 2021 and 2022 for new crypto projects, making the IDO market a huge and profitable opportunity for those of us who believe

in the future of cryptocurrency and want to support the journey, whilst capitalising on its success.

Decentrapad allows our users to do just that, in the fairest way possible.

What a Good Launchpad Should Do

Launchpad	Project vetting & scam protection	Mobile compatibility	Multichain support	Low barrier to entry (<500USD)	Pre-deposit	Auto-investment	IDO calendar	Custom notifications	ALWAYS guaranteed allocations

Solanium	✓	✓	✗	✓	✗	✗	✗	✗	✗

Whilst there is no shortage of good launchpads out there. Very few do what we feel they should, and **none offer what Decentrapad can.**

Decentrapad offers several features which are entirely unique and revolutionise the way we expect to do IDOs:

- **Auto-investment - Never miss an IDO again**
- **IDO calendar - Track your IDOs and investments across ALL launchpads in one place**
- **Custom notifications - Receive updates how you want them. Including: SMS and Email.**

What we stand for

The Decentrapad mission is to create a launchpad which solves the main issues in the cryptocurrency IDO market today. The goal is to be THE multi-chain launchpad of choice boasting a seamless, silky smooth and fair user experience, with some features that no other launchpad is currently offering.

Compatibility

As the cryptocurrency world continues to grow and expand, we believe it is essential that our users can participate in new projects developed on several different blockchains.

Including:

- **Ethereum**
- **Binance Smart Chain**
- **Cardano**
- **Solana**
- **Polkadot**
- **Cosmos**
- **Tron**
- **Avalanche**

We will achieve this in a staggered style, releasing new blockchain projects as we progress through our development. Initially, only projects on the Ethereum and Binance Smart Chain (BSC) networks will be supported.

Inclusivity

The IDO world is a world of investment. This means that smaller players often get left out. Every launchpad we have sampled, disproportionately rewards the big wallets and "whales" with pool weights and allocations that are not linearly related to the number of tokens held/staked. We want to change that to make it fair for the community which makes the crypto world the powerhouse that it is.

Other launchpads decide participant allocations via a tier system, lottery system or some combination of the two. In all cases, the number of tokens you hold increases your pool weight **disproportionately**.

For example,

If participant A stakes 1000 tokens and participant B stakes 2000 tokens, then participant B would have MORE THAN DOUBLE the allocation/winning chances of participant A.

We don't think this is fair, as it acts as a barrier for smaller investors to purchase into new projects and puts control firmly in the hands of the large, "whale" wallets.

On Decentrpad, your allocation is **always guaranteed** and is **directly proportional** to how many **DCP tokens** you stake.

Decentralisation

Decentralisation is arguably the core and founding principle of Bitcoin and the cryptocurrency world as a whole. Therefore, we believe firmly in a launchpad that is funded and managed in a decentralised way.

This means that Decentrpad will be the **only launchpad entirely funded by the community**:

- **NO partnerships with venture capitalists**
- **NO large "whale" wallets holding a majority of the tokens**
- **NO "private sales" of DCP token which are only open to the select few**
- **Decentrpad will be the only launchpad run by the community: ALL major decisions will be held to vote by token stakers***

*major decisions requiring a vote are limited to those which are likely to cause a change in policy, procedure or have a significant impact on user experience. The Decentrpad team reserve the right to decline a request to vote over an issue put forward by a member or members of the community, if it does not fit the aforementioned criteria. All votes will be settled on a "majority wins" basis. i.e. the most votes wins.

The DCP token

A BSC token

We have chosen the BSC network for the DCP token for a combination of reasons. Namely:

- **Speed**
- **Low fee cost**
- **Compatibility**
- **Community support**

Utilities of DCP

- DCP token will give the token holder access to **any** project launching their IDO on Decentrapad (see allocation system for more details).
- Staking 10,000 or more DCP will give you instant access to all of Decentrapad's **premium features**.
- DCP staking will earn you rewards in the form of airdropped DCP to your wallet every month.

Allocation system

DCPower

Staking DCP will be used to calculate **DCPower** which will be calculated and updated on a weekly basis, based on the following parameters:

- **Every 50 DCP tokens staked will give 1 DCPower (minimum staking period of 7 days)**
- **A minimum of 50 DCPpower will be required to participate in any IDO**
- **No wallet will be able to have more than 10,000 DCPower**

DCPower will be used to calculate your guaranteed allocation using the following formula:

$$A = \frac{D}{T} * P$$

A = allocation size in USD

D = DCPower

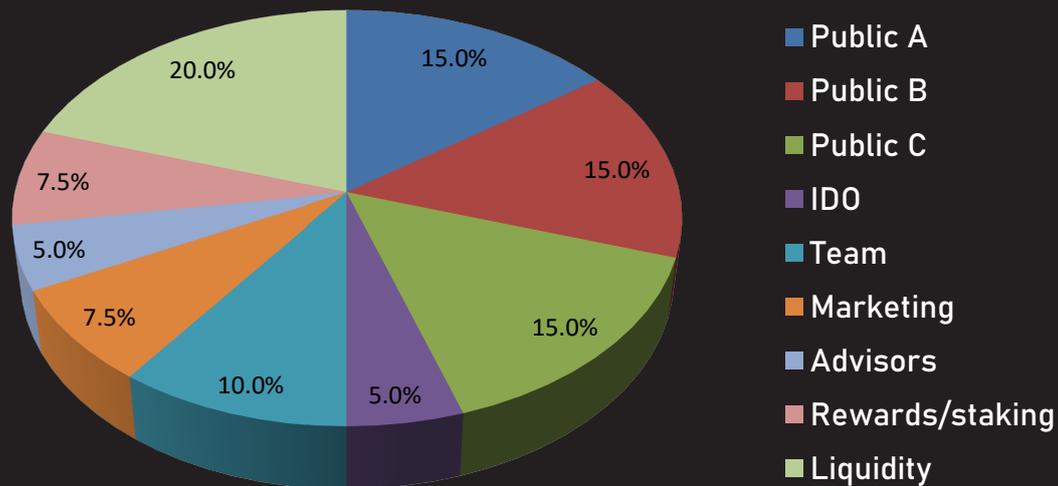

T = Total DCPower in pool

P = Pool size in USD

Following the guaranteed allocation, each wallet will also have a first-come-first-served **(FCFS)** allocation which will be **50x the guaranteed allocation**, up to a hard individual cap of **\$1000**.

Tokenomics

As Decentrapad is community funded and committed to decentralisation there will be **NO seed rounds** and **NO private sales**. All sales of the DCP token will be **public** and held in a fair way.

Public Sale A

- Tokens: 15,000,000
- Price: \$0.006
- Amount raised: \$90,000
- Vesting: 10% unlock at TGE, then monthly unlock over 4 months

Public Sale B

- Tokens: 15,000,000
- Price: \$0.008
- Amount raised: \$120,000
- Vesting: 15% unlock at TGE, then monthly unlock over 5 months

Public Sale C

- Tokens: 15,000,000
- Price: \$0.01
- Amount raised: \$150,000
- Vesting: 17.5% unlock at TGE, then monthly unlock over 8 months

IDO

- Tokens: 5,000,000
- Price: \$0.02
- Amount raised: \$100,000
- Vesting: 20% unlock at TGE, then 2 month lockup then monthly unlock over 4 months

Team

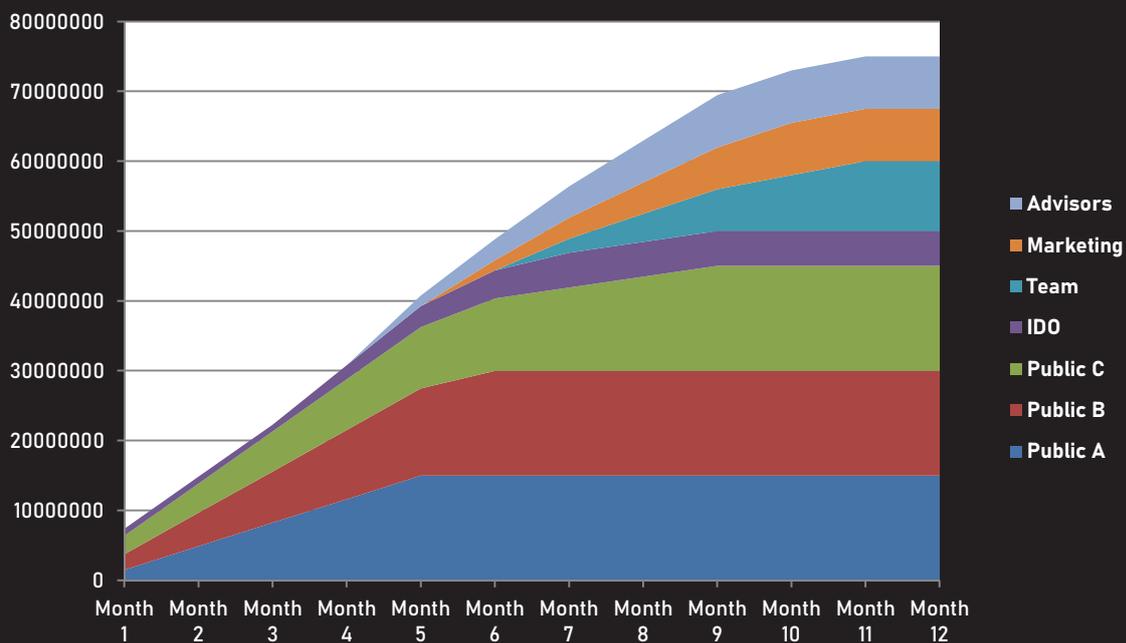

- Tokens: 10,000,000
- Vesting: 6 month lockup, then monthly unlock over 5 months

Marketing

- Tokens: 7,500,000
- Vesting: 5 month lockup, then monthly unlock over 5 months

Advisors

- Tokens: 7,500,000
- Vesting: 4 month lockup, then monthly unlock over 5 months

Based on these figures, Decentrapad would have an initial circulating volume of

7,375,000 tokens

and an initial market capitalisation of

\$147,500

The Member's Hub

The Member's Hub is Decentrapad's solution to endless clicking and scrolling trying to find your wallet balance, your allocations, your upcoming IDOs and your vesting unlocks. Here, you will find all that information in one place, easy to read, smooth to navigate, no fuss.

More details coming soon...

Premium Features

As a reward to some of our more dedicated supporters, all members staking 10,000 DCP or more for a period of more than 7 days, will automatically have access to our premium features.

These are designed to smoothen your experience, make it easier to invest and ultimately, make your investments more profitable.

The Investor's Calendar

As every crypto investor will know, it can get difficult to keep track of all the different coins and projects you take an interest in. Whilst there are countless portfolio management apps and services out there, they are often **useless for projects/tokens which have not listed yet**.

The Investor's Calendar by Decentrapad is the first in the world to be entirely dedicated to IDOs only. Here you will find a fully editable and comprehensive calendar where you can input:

- IDO project name
- Number of tokens purchased and at what price
- Vesting unlocks

Then sit back as the calendar does all the hard work for you:

- Custom reminders on vesting unlocks
- Notifications for significant price changes
- Market data tracking (after listing)

More details coming soon...

Auto-invest

We are all busy people and we don't always have the time to be glued to our screens, waiting for IDO time to come so that we can scramble to buy our tokens.

Auto-invest allows premium users to automatically deposit their IDO funds at the right time, using a custodial wallet service

In order to do this, premium members simply have to top-up their **Decentrapad custodial wallet**, and go to the "Auto-Invest" tab where they can check upcoming IDOs they are eligible for and decide how much they want the **Auto-Invest bot** to invest

When the project is in the "collecting funds" stage, the investment will automatically be deducted from the custodial wallet, done!
